PRESIDENT'S MESSAGE

The mission in the establishment of our Orchid Society was many fold. First and foremost in 1943 the mission was to bring likeminded orchid lovers together. 78 years later, that is still the best reason! With the formation of the club as a non-profit other requirements became necessary to claim that status and the completion of our 501c designation complicated things a bit more. BUT the main idea is still getting likeminded orchid lovers together for fun and learning. That said, it takes a bunch of planning and organizing to make our club one that YOU want to attend and look forward to each month. Fellow members work tirelessly behind the scene to ensure it all comes together every month. The survey response in January was encouraging and gave us valuable information about where we want our club to go over the next year at least. Thank you to those that took the time to respond. I think you will see that we, the BOD, hear you.

Since part of our written mission is education we will try to improve this in our monthly meetings by focusing on our more novice members while utilizing the experience of our more mature growers.

PRESIDENT'S MESSAGE (CONT.)

- We have adjusted the budget numbers to enable us to bring in speakers who we could not afford to get due to travel and honorarium constraints.
 - In order to do this we will have a "hands-on" event quarterly that will be led by your 'old' members eliminating the expense of a speaker. Find a BOD member or come to me with suggested topics.
 - We also have our quarterly "Show Where You Grow" events. We need volunteers to show off the growing area you use. See Jackie to get on the list. We hold potting clinics at these events as well to do repotting of your own orchids under guidance from one of our 'old' guys. Our February event will be Sunday February 14, 2 - 4:30 at Harry's home. Mark your calendars now.
 - Be sure to print out the new event calendar that is now available through the newsletter and the website. Put it on your fridge!
 - There is a new column in this and future newsletters devoted to EDUCATION. Be sure to check it out!
 - We are also adding an additional re-potting site to assist and educate the community. Along with Ace Hardware on the first Saturday of the month, we'll begin the same clinic at The Plant Ranch on Beach Blvd. in April and will meet there the third Saturday. Volunteers are needed at both sites.
- We have a very busy year ahead of us. Come along for the ride. You won't be disappointed!

Respectfully,
Lois Rasmussen

BOARD OF DIRECTORS

EVENTS

Speakers

Speaker list for 2021 is tentative but is as follows:

Feb- Cymbidium Week! Speaker Harry McElroy will also host a greenhouse tour at his home the following Sunday!

Mar- Show Meeting. Lorraine Conover

Apr- Steve Hawkins. Oncidiums

May- Picnic; no meeting

Jun- Jim Roberts, Florida Suncoast Orchids. Hands-on potting event

Jul- Lorraine Conover, Lois Rasmussen. Hands-on mounting event

Aug- Thanh Nguyen, Springwater Orchids. Topic TBD

Sep-

Oct-Art Chadwick. Topic TBD

Nov- Fred Clark; Sunset Valley Orchids, Topic TBD

Dec- Christmas Event, no meeting

Greenhouse Tour

Cymbidium Week continues!

Come learn more and visit Harry's greenhouse!

Light snacks and BYOB

Potting clinic

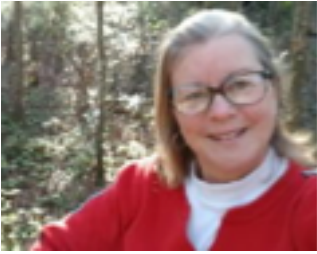

Bring a chair and your sweetie!

Sunday, 2/14, 2 - 4:30 pm

12010 Hood Landing Rd
Jacksonville FL 32258

WELCOME, NEW MEMBERS!

Jacksonville native, **Christine Simmons**, currently resides in the Avondale/Riverside area. She says, "My first orchid was a small grocery store variety given to me as a thank you gift. In 2019 I was invited by a friend to go to the orchid show at the garden club in Riverside and I was AMAZED at all the varieties, shapes and colors. I bought Paphiopedilum I named Pistachio, and a Cattleyas - Fire Magic from Krull-Smith. Expensive little creatures. Since then I've collected one from the Ace Hardware, 2 from the plant grower at the farmers market and my daughter gave me a Phalaenopsis in 2019 that is currently blooming. I don't have a favorite species yet. I am learning about them and how to care for them. Many years ago I collected African Violets and was very successful getting them to bloom and thrive so I am not a novice gardener, just new to orchids.

I enjoy nature walking, gardening, bird watching, music, trying new restaurants and meeting people. I am looking forward to what I can learn and contribute to the JOS."

Kathleen Snyder and son, **David** recently moved to the Jacksonville area from West Virginia, bringing enough plants to warrant purchase of a greenhouse!

Kathleen is a seasoned orchid grower with 45 years' experience. She started growing in orchids inside when living in Buffalo NY. Moved to Martinsburg in West Virginia where she grew 200 plants under high intensity lights in her basement.

In September of 2020 she and her son moved to the Jacksonville area and brought 100 plants with them after selling half the collection. Her favorite genera are Cattleyas and Vandas.

Kathleen has belonged to the Lord Fairfax Orchid Society where she was involved in presenting educational seminars to aspiring orchid growers. She also belonged to the National Capitol Orchid Society and was involved in the annual show and assisted as a clerk for the AOS judging.

They have recently built a 12 X 20-foot greenhouse and her son, who is her technical support, has been busy checking the systems to accommodate their collection.

She welcomes any suggestions!

ATTENTION!

Anyone currently holding on to library books,
please return them!
THANK YOU!!!

WANTED

ALL MEMBERS!!

**Our Show is just weeks away and
Empty time slots to fill.**

**Work shifts are divided into 2.5 - 3 hour slots on
Saturday and Sunday so there is time to shop.**

Friday, more help is needed for Vendor set up.

**Saturday & Sunday "Ambassadors" are needed for
walking around inside watching the displays, outside
observing, parking assistance & help with questions.**

Potting Tent Our repotting service. Great for
Novices to help and learn at the same time.

Sunday Breakdown needs you too.

Call Bonnie Myers today!!

904-571-3103 or email Myers3922@bellsouth.net

NO EXPERIENCE NEEDED!!!

SECRETARY'S MINUTES

January 12, 2021, Mandarin Garden Club

Meeting called to order at 6:57 p.m. ET By Lois Rasmussen, President.

President's Report by Lois Rasmussen:

- Changes to bylaws will be sent to members this month for review. A vote to approve will be on the agenda of the February meeting.
- Christie Peppard volunteered for new Sunshine Chair. Thank you, Christie! This position notifies the club when another member is ill and sends a card. Please call or text Christie at 904-349-7717 if you know of a club member that is ill. Please don't email her.
- An AV volunteer is needed to set up the speaker system and all equipment for the monthly meetings. Please contact Lois Rasmussen if you're interested.
- Please welcome Jackie Dougherty as the new newsletter chair! Please send any articles on your favorite orchid topic to Jackie.
- Potting Clinic – Ace Hardware on San Jose. A great way to learn how to repot orchids. Starting a new venue on the third Saturday of the month at Plant Ranch on Beach Blvd. beginning April 17th. Colin Cage is the point of contact for Plant Ranch.

Secretary's Report by Deborah Courtney: Membership approved the November Minutes as published in the newsletter. No minutes from December since it was the Christmas Party.

Treasurer's Report by Alex Romero: Membership approved the Treasurer's Report as published in the newsletter.

1st Vice President and JOS Show Chair Report by Lorraine Conover:

Please see the January newsletter for a list of speakers for 2021.

JOS Show Update – Six orchid vendors have committed so far. In addition, four orchid societies have been invited to do displays. One JOS member will have a display table. Volunteers are needed and someone is required to oversee security. Posters should be available at the February meeting for members to post in the community.

2nd Vice President Report by Jackie Dougherty: Next Greenhouse tour is February 14 (Valentine's day) at Harry McElroy's house. Look for details in the newsletter. Harry has a huge greenhouse and specializes in Cymbidiums so you won't want to miss it. Will also have a potting clinic so bring your plants to repot (you repot with instruction).

JOS Picnic is scheduled for May at Eric Cavin's house. More details to come.

Membership Committee Report by Colin Cage:

- Thank you to everyone that completed a club survey. Your opinion counts!
- Member dues are due now. \$25 individual, \$35 family.
- Colin welcomed four guests and two new members.

Librarian Report by Bonnie Meyer: A rotating selection of books from our inventory is brought in each month. Also have videos to check out.

SECRETARY'S MINUTES (CONT)

Member Discussion: Phalaenopsis – What to do with the spike after it blooms? If the spike is brown, cut it off. If the stalk is green, leave it alone until it turns brown and then cut it. When cut into a green spike, it exposes the plant to disease. Can plug it with cinnamon (but keep off the roots). Once new spike reaches around 6 inches then stake it up to train it up. The stake helps the flower to be upright with the flower visible for viewing. The flowers will all be facing the same way since going to the sun. Sometimes a spike will not produce blooms.

Treat Paphs like a Phalaenopsis.

Guest Speaker: Marv Ragan, long time JOS member and AOS judge spoke on The Enigmatic Encyclia.

When Marv was in his 30's he saw an Encyclia and it was love at first site.

Encyclias are a new world group that ranges from Nassau county Florida (northern point) and as far south as Argentina. Plentiful in the Caribbean. The genus was established in 1848. It's difficult to identify different species since so similar. Some species were destroyed during the bombing in WWII.

Encyclias like to grow in limbs of an oak tree. They like good drainage and frequent water. Summer bloomers. Very fragrant. Like strong cattleya light. Marv likes to put them in baskets with Osmoda. He used clay pots with Osmonda. Clay pots cool the roots down. Osmonda is hard to find now. Tree fern is next best but also getting scarce.

Encyclia varieties:

- One of the best is Enc tampensis MAJ AM/AOS. Varies a lot.
- Encyclia phoenicea strain from Caymans. Beautiful ruffled pink lip. Fragrant and blooms for 2 months. Smells like vanilla. Comes from Cuba.
- Enc. Codigera has a dark form and a white lipped form.
- Encyclia ambigua – one of Marv's favorites.
- Encyclia fucata – this is the orchid that got Marv hooked.
- Encyclia howardii – Marv sold his soul for it. A long straggly inflorescence. Purple and green.
- Enc steinbachii – loads of cream flowers.

Show Table: Harry McElroy reviewed the winning orchids from the show table. Congratulations to the winners!

Raffle: The raffle plants were from Carmela in Hawaii. Annalee McEnamy and Christie Peppard announced raffle winners and handed out plants to the lucky recipients.

Hospitality: A big thank you to Carol Engle for the delicious Apple Crisp with ice cream. Yummy!

Meeting adjourned at 8:44 p.m. ET.

Respectfully submitted,

Deborah Courtney

Secretary

THIS MONTH'S MEETING

The February General Meeting of the Jacksonville Orchid Society (JOS) will be Tuesday, February 9. Doors will open at 6:00pm and the meeting will begin promptly at 7:00pm.

Prior to the start of the meeting, please buy your raffle tickets. Harry McElroy will provide the orchids for the raffle table and we anticipate a good selection. Don't miss this chance to pick up different genera of orchids to add to your collection at a good price.

Also prior to the meeting, members are welcome to privately sell **no more than 2** orchids with 20% of proceeds going to the JOS. Items other than orchids may be offered for sale as long as they are orchid related. For example: orchids, plant hangers, potting materials or plaques qualify. Also, items with an orchid theme are also welcome such as: ceramic items, paintings, books, clothing, etc.

Members may also offer two orchids at the Silent Auction Table. All orchids should be in bloom; if not, they should be accompanied by an appropriate picture or description.

Show Tables will be set up and we encourage you to bring in blooming orchids to compete!

At 7PM, we will have a brief business meeting and then take a brief break for you to finish your purchases, enter the raffle, and allow for late comers to do the same. We will then reconvene for the evening's presentation by our own Harry McElroy on Cymbidiums.

NEW MEETING LOCATION! Remember that our new location going forward will be at the Mandarin Garden Club in Jacksonville, FL:

Mandarin Garden Club
2892 Loretto Road
Jacksonville, FL 32223

Social Distancing. Covid considerations will be with us for the foreseeable future. Please bring a mask to wear if you can't maintain social distancing. What does that mean? Wear a mask if you can't be 6 feet away from others at the meeting.

Our General Meeting is a good time to ask questions from our expert growers and get tips for what to do when there is a problem. We cover a wide variety of topics including species and hybrids that are good to grow in this area, identification of pests and diseases, watering and fertilizing, and where to grow your orchids.

THIS MONTH'S SPEAKER

HARRY MCELROY

My working life began as a basic farm kid and I loved to grow things. Alfalfa, wheat, potatoes, lettuce, sugar beets and especially beans. I learned my best early growing lessons from 80 acres of pinto beans. As I worked the fields my eyes were always looking to the sky, I watched every airplane that flew over with keen interest and was a member of the "Ground Observer Corps". I studied at Idaho State College Aviation Maintenance School where I became an Aircraft Mechanic. The first summer out of school saw me working on crop dusters, then I decided to join the Air Force. My Air Force enlistment had two stages, first as a mechanic on the R4360 aircraft engine (A 28-cylinder monster) and 6 years as launch crew on the Titan II ICBM.

After 8 years in the in the USAF, I spent 32 years as a Field Engineer with Sikorsky aircraft and traveled the world teaching and assisting customers with technical and maintenance problems on the company's product - helicopters.

Around 1978 I bought my first orchid - the Cattleya "Bow Bells" followed by many more. I had to leave them all behind when assigned in 1983 to the Philippines. I later returned to California with a Vanda and Phalaenopsis collection in boxes and a beautiful wife. During the next 10 years, many Cattleyas and miscellaneous species were added. My collection of cymbidiums began in earnest.

I was assigned to Sikorsky's home office in Stratford, Connecticut. My orchid collection went into boxes, then across the Mojave Desert in July in a non-airconditioned moving van. They were thrown on the ground on a tarp for two months in the woods behind a friend's house until I could rent a house and build a temporary greenhouse out of PVC pipe and plastic. They all survived the trip and two winters in Connecticut until my assignment to Jacksonville in 1991, where I have remained until today.

My interest in cymbidiums really took off in Connecticut. A member of the Connecticut Orchid Society, Dr Gustoff Melquist saw a few of the cymbidiums I brought to meetings and pulled me aside and talked to me. Gus was to be the mentor that shaped my future. Gus was no ordinary orchid grower - a past curator of the Missouri Botanical Gardens, a Plant Cytologist, cymbidium expert and a prominent scientist who wrote a lot of what we know about plant genetics.

Most of us will find our greatest joy in growing a species that we know the most about. Gus, a retired college professor, got to me. He kick-started my interest in cymbidiums. No longer just one of my collection, cymbidiums are the most important of all the plants I own and I will never tire of learning more. Some of the other plants in my collection get neglected but not the cymbidiums. My beautiful Vanda collection is missed a lot. We had a heater failure one winter and the vanda's are mostly kaput and a lot of the other plants were "hurt" but the cymbidiums seemed to smile.

**ATTENTION MEMBERS
BRINGING PLANTS FOR
SALE!**

Only 2 per member at this meeting,
please!

Thank you!

DID YOU KNOW?

The Jacksonville Orchid Society's mission is based on education about orchids. Specifically, from the Constitution and By-Laws—

The Jacksonville Orchid Society exists to further education about orchids by focusing on the ecology, conservation, preservation, science, cultivation, hybridization and uses of orchids. The specific purposes of JOS are to promote and aid in the development, improvement, preservation, cultivation and hybridization of all orchids; to collect information relating to the growing and development of orchids; to disseminate information concerning the culture, hybridization or development of orchids by means of exhibitions, lectures and publications or otherwise; to assist those engaged in the growing of orchids by such research and dissemination, to increase public interest in the growing of orchids and generally to foster the knowledge, production, use and appreciation of orchids.

And, so, look each month for our Education Corner! Below is our first installment, courtesy of Lorraine Conover. If there are any topics you'd like explored, email me! saedocs@aol.com

Preparing Orchids for Show Table & Judging

What does staking and preparing your plant for show judging mean?

Pre-Show Prep

Clean off each and every leaf, top and bottom. You can use milk or beer. Yes, beer--I know a very well-known grower that has lots of awarded plants who uses beer. Or use a mix of lemon juice with water on a soft cloth, wiping built-up residue. I usually re-wipe with a clean wet cloth. Never use Leaf Shine. The leaves should look clean, never shiny. That is a big AOS "no-no".

Trim out any unhealthy roots, pseudobulbs, old brown spikes and spikes without flowers. Make sure the flowers are close to prime and not withering - freshly opened with their best color. All plants should be completely BUG-FREE! Flush out the medium to check for ants. If you see any, drench the pot with a mixture of 1/3 each 409, water and alcohol. Let sit for a few minutes, then flush with clear water. Do that a few days prior to make sure all the little buggers are gone.

Staking

When? Some plants have strong flower spikes and may not need to be staked. Others have decent spikes but large, heavy flowers. The trick is to stake the spike upwards as much as possible before the buds are opened. When they open, they will have acclimated themselves to the right position. If you wait until the flower opens to stake it, the flower will face the ceiling. Blooming Phals in stores are staked so that just about every flower is in a position to be seen completely.

How? Stake your Phals as the spike is growing and train it straight while the spike is still movable and not hardened off. I use plastic clips or soft wire that I gently twist around and adjust weekly. When it's mature, replace the training wire with clips and a painted stake. For Cattleya, stake when the buds are forming so they open properly. If you have two buds really close together, carefully place a small piece of Styrofoam between the flowers as they are opening to separate them. For multiple stakes in a pot, place potential stakes as the spikes get going so you can attach clips as needed. You don't want the stakes to be crossing each other and damaging nearby flowers.

With What? I am comfortable using 16 gauge drop ceiling wire, cutting it to the necessary length. Spray paint a muted shade of green similar to your leaf color. You can also use florists' wire in the heavier grade and paint for thinner stakes. Try to make the stake blend in. Wire can be bent if needed to support a strange angle in the pot. Bamboo stakes work, but are not flexible and not always thin enough. Use plastic clips and a bit of Spanish moss to cover the clip.

Containers

Choose a container that best complements your beautiful plant without detracting from it to improve its overall presentation. An off white, muted shade of green or other dark color generally works well. I have used wicker baskets for something large and let moss drape over the sides so that the plant is the center of attention, not the basket! Using a wood-slat basket can also work for a natural look. Try a variety of containers, choosing the one you think best highlights the plant you've put so much in to.

In Conclusion

Practice staking your plants to look their best. You want to show it off and there is a big difference between taking it right from where it is growing to getting it worthy of ribbons and the elusive AOS award. Practice, Practice and then do it again. Each plant you work on will give you more practice and satisfaction.

Don't be afraid to ask for help. We are a group of orchid lovers with all levels of experience. I, for one, started out not brave enough to bring in a plant for judging. But I listened intently and asked questions. And when I finally did bring my plants in, it was a great feeling. I challenge each one of you to put in a little extra effort now to help your plants show off their beauty come show-time. That is why you bought them in the first place!

Happy Growing

Lorraine Conover

IT'S COMING!
 JOS ANNUAL
 PICNIC!
 MAY 2

GREENHOUSE TOUR FAQ

Do I need to have a greenhouse to host?

NO! Wherever you grow your orchids is of interest to others in the club. Screened porch, pool enclosure—wherever!

I don't know much about re-potting. Will I need to do that?

You don't have to, but what a great way to learn!

Do I need to know a lot about orchids?

NO! In fact, what better way to ask questions of the experts than to have them at your house!

What should I expect?

Lois will come and set up a tent for repotting. Members will want to see your space, and mostly just enjoy a little social time with friends! It's all about having fun!

Do I need to provide food?

You don't have to, but it does add to the festive atmosphere!

Why should I go?

You get to see other ways to grow your plants, you'll learn something new, and you may get to purchase a new orchid!

ORCHID CONTESTS

January Beauty Contest Winner

Lc Irene Finney 'York'
Christina Bonelli Roadruck

Thanks to all who entered!!!

Monthly Beauty Contest Rules

Post a picture of your prettiest orchid growing during the month on the JOS Facebook page and note it as an entry in the Beauty Contest. At the end of the month, a panel will judge that month's entries and select the prettiest orchid! Be sure to include your name and the name of the orchid. You can enter as many as you like!

My example is: Angraecum Veitchii by Art Russell - January 2021 JOS Orchid Beauty Contest

Participation is open to all members of the Jacksonville Orchid Society.

WINNER ANNOUNCEMENT

We'll announce the winner at the following month's meeting of the Jacksonville Orchid Society, and here in the newsletter. The winner will receive a bare-root Cattleya or other award as determined by the Board of Directors of the Jacksonville Orchid Society. You don't need an expensive camera to enter pictures. Keep it simple; a cell phone can record amazing images. We just want to see some pretty orchids!

JOS ONCIDIUM SPHACELATUM CONTEST

Update!

The contest began in September. Art Russell reports the first blooms! Who else now has blooms from their *Oncidium sphacelatum* received as part of the contest?

JOS ANNUAL ORCHID SHOW

We are just ONE month away from our 2021 Orchid Show on March 20 & 21! Mark your calendars and plan on attending!

Volunteers are still needed! There are many times and tasks available! If you are able to help out your club, and make this show a success, please contact Bonnie Myers—904-571-3103, Myers3922@bellsouth.net ASAP!

Last call for sponsors for our trophies. Locally owned businesses will get their names publicized at our show, on an award and in our newsletter. Jackie Dougherty 703-625-4760, saedocs@aol.com.

New Members, this is the perfect opportunity to really get involved and work one on one with other members and learn from doing. **No experience necessary!**

Any questions please call me (Cell) 561-302-6010 or (Home) 561-395-2145.

Lorraine Conover, Show Ch.

INTERESTED IN GOING TO THE FESTIVAL IN APOPKA, BUT DON'T WANT TO GO ALONE?

Jacksonville Orchid Society Ramble – February 13th 2021

A ramble to Apopka is planned for February 13th to the Apopka Valentines Day Orchid Festival. Please see the calendar below for the details.

The transport will be individual so please check with your friends and neighbors who would like to car pool. The plan is to have everyone arrive at the festival in enough time to do your shopping and then for us to all congregate at one of the local BBQ restaurants to enjoy a social gathering at 1:00 pm.

I have contacted Imperial Supplies in Apopka and they will not be open so please do not plan on swinging by to pick up some Orchids.

If interested, please contact me at colincage@gmail.com and include the telephone number you plan to have with you on the ramble. I would like to set up a text group so we can stay in contact at the festival.

February 2021	 Jacksonville Orchid Society 						
	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
The educational program this month will be presented by Harry McElroy . Harry is a long time JOS member and Past President, and an acknowledged local authority on Cymbidium Orchids.		1	2	3	4	5	6 Ace Hardware Potting Clinic 10:00 am
